

FreeGoZone

Cold Logistic Services

Why Choose Us?

- Our warehouse is equipped to handle a wide range of storage requirements from Deep Freeze to dry.
- With our strategic location in the free zone of Beirut port, FreeGoZone is ideally situated in the heart of the capital, near major industrial areas allowing us to conveniently service importers, exporters, processors and distributors.
- You can be assured that your inventory is safe under our close supervision and that your customers' requirements are timely met.
- Outsourcing your warehouse inventory management allows you to optimize your resources in order to better focus on your core business.

At a Glance

FreeGoZone is a third party cold logistic company. Its strategic location inside the free zone of Beirut Port in the heart of the capital makes it an ultimate facility for storing goods. This ideal location, near major industrial areas, allows FreeGoZone to conveniently service importers, exporters, processors and distributors.

The facility is equipped to handle a wide range of storage requirements from Deep Freeze to dry. FreeGoZone runs on the latest Warehouse Management Systems to keep swiftness with

your changing needs and provide you with improved services through continuous measurement of key performance indices for all operation processes.

FreeGoZone provides as well a large variety of value added services that complement the basic handling and storage functions.

Through its dedicated warehouse services and reliable solutions, FreeGoZone can support diverse industries like FMCG, pharmaceuticals, perishable commodities, etc...

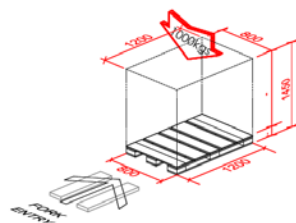

Frozen and chilled Product Diversity

The freezer area located on the ground floor has chambers of large sizes that offer facilities for storage of products already frozen. Freezer rooms are designed for temperatures of $-18 \pm 2 \text{ }^\circ\text{C}$ and $-28 \pm 2 \text{ }^\circ\text{C}$.

2 freezer rooms of 620 m² area each are equipped one with mobile racking and one with selective racking with 2600 and 1600 pallet positions respectively. Goods are stored at a temperature of $-18 \text{ }^\circ\text{C}$ and at an ascending height reaching 12 m.

2 smaller freezer rooms of a total area of 400 m² are equipped with selective racking with 460 pallet positions each. Goods are stored at a temperature of $-28 \text{ }^\circ\text{C}$ and at an ascending height reaching 12 m.

The total freezer volume is 21,650 m³ and has a total capacity of around 5000 pallet positions.

PALLET DETAILS

Our Value Added Services

- Labeling
- Palletizing
- Wrapping & weighing
- Managing inventory data
- Order picking accuracy
- Repacking
- Guarantying food safety
- Temperature controlling
- Goods Transporting by transit
- Cross docking

| Freezer Room | Cold Room |
|-------------------|-------------------------|
| Meat | Vegetable & Fruits |
| Poultry | Dairy Milk |
| Frozen Vegetables | Pharmaceutical Products |
| Seafood | Chocolate |
| Ice Cream | etc... |

The multi-purpose cooled chambers, located in the basement floor, offer different temperature ranges that suit different customer needs.

Their related capacity is around 2400 pallet positions. Room sizes vary from 85 m² to 125 m² with a height of 3m.

The basement floor has a special customization room of 190 m² area that has a temperature of 0 to +5 °C.

In addition to an industrial pallet elevator that links the receiving area of the ground floor with the customization room of the basement, a ramp with a moderate slope allows access to direct pick-up/delivery to the doors of the chilled rooms.

First Class Service

We guarantee first class service due to our state of the art facilities:

Truck yards

Our location at the free zone border line distinguishes FreeGoZone by its truck yard that offers low traffic staging areas and electrical plugs for charging reefers all around the facility. This allows for goods to maintain their temperature while loading/unloading, and for carriers to have greater performance which improves our service level.

WMS (Warehouse Management System)

Our WMS brings efficiency to warehousing by introducing automated processes and tighter control structures. It optimizes your inventory with accurate forecast and provides flexible automated support for processing movement of goods and management of stock. Our WMS system also allows our customers to access their inventory via our web portal. All of the above leads to optimal management of product expiry.

Racking Systems

Our warehouse is equipped with both “Kardex Stow” selective and mobile racking.

The selective pallet racking system is modular and can be easily adjusted to your needs. Our automated mobile racking system is composed of conventional pallet racking installed on mobile bases. This setup allows aisles to be opened and closed as required. It enables compact storage while keeping the stored products accessible. This provides improved performance, efficiency, better product storage, and overall facility safety and housekeeping. The benefits to our customers include a faster and more accurate selection process, less damage to product inventory, while also providing superior service levels.

Dock Doors, Shelters and Levelers

Our warehouse docks are designed to guarantee easy staging and integrity for products. The 6 loading docks (inbound and outbound) are equipped with insulated shelters allowing the staging area temperature to be maintained at 0 to 5 degree Celsius and with mechanical levelers offering you the possibility to bridge the difference in height and distance between the warehouse floor and vehicle in an optimal way.

Refrigeration

Our facility has been designed with the newest, state-of-the-art refrigeration components. Each freezer room has redundant refrigeration units, and relies on additional source of power supply to ensure the sustainability of operations. All compressors use R404A and R407C, the currently efficient and environmentally friendly refrigerants. Our Eliwell temperature control system ensures superior quality and integrity for your products.

Material Handling Equipment

FreeGoZone warehouse utilizes the most modern material handling equipment from Germany. “Jungheirich” offers Space-saving design, high performance, innovative technology and optimum ergonomic working conditions.

Our equipment is battery power driven, operates in a flat leveled floor surface with residual capacities of 1000 kg to over 10 meters lift height. The embedded heated cabs ensure driver comfort, and highest performance in the below zero-degree temperature.
